NEW criterion of Forklift Trucks

Hyundai introduces a new line of 7A-series LPG forklift trucks. Excellent power and performance make your business more profitable.

OPSS (Operator Presence Sensing System)

Control of mast tilting, lifting and lowering is not possible when the operator is not in the normal position.

■ Photo may include optional equipment

The new master on your job-site!

Smooth running, efficient and ergonomically designed, 25L/30L/33L-7A series are made to meet your needs.

44kW / 2,300 rpm

Powerful Engine

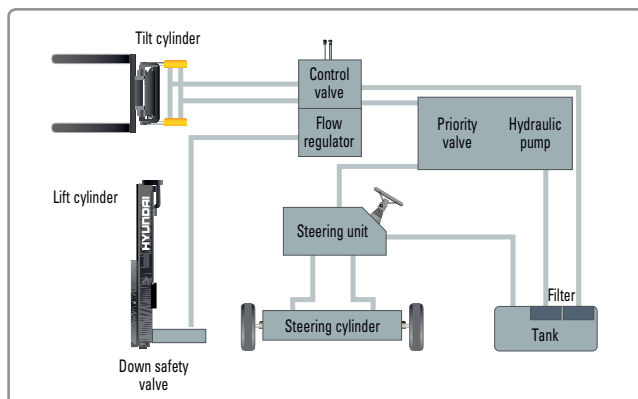

HMC L4KB(2.4L) Engine

Powerful and efficient engine Hyundai engine provides excellent fuel consumption, excellent torque and improved operator's comfort. (EPA/CARB Tier-IV Certified)

Fast and stable performance

Being able to quickly raise and lower the mast, as well as tilting forward and backward, the truck provides you the best operational conditions during loading/unloading operations.

With a loaded truck, mast lowering speed is carefully controlled by a control down valve to ensure full safety on the job.

State-of-the-art hydraulic system

The latest designed, large-capacity hydraulic system including a low-noise control valve shortens reaction time during operation and improves both efficiency and durability.

Fully hydrostatic power steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and steering wheel kick-back.

High Power Low Noise

Increased mast tilting angle

A mast tilting angle of 6 degrees forward and 10 degrees backward gives the operator a safe and rapid platform for loading and unloading jobs.

Faster travel speed & better grade-ability

The powerful high-output engine provides greater acceleration, better grade-ability and faster travel speed on any tough terrain or slope.

Grade-ability (Loaded)

25L-7A : 20.4°
30L-7A : 16.5°
33L-7A : 15.4°

Travel speed (Unloaded)

25L-7A : 17.7 km/h
30L-7A : 18.6 km/h
33L-7A : 18.6 km/h

Ergonomic operator friendly compartment design!

A design based on human engineering relieves fatigue and increases operator's efficiency.

Operator friendly gauges and water-resistant monitor panel

Easily adjustable suspension seat

An attractive and adjustable seat with armrests, based on a human engineering design, provides great comfort, safety and durability.

High visibility for safe operation

The operator is able to work with increased safety and accuracy due to a wider view mast.

Ergonomic positioned pedals

Based on human engineering, the accelerator, brake and inching pedals are optimally positioned for operator's convenience. Easy to remove cleanable rubber floor mat.

Cup holder & console box

Additional storage spaces are located inside the operating space.

Quick Response of Operating Control Levers

Only minimal operator's effort is required for precise, safe and productive control.

Travel Speed Control System (Option)

← In-Door : Max. Travel Speed 8 ~ 13 km/h

← Out Door : Max Travel Speed 15 ~ 19 km/h

■ Photo may include optional equipment

Adjustable steering wheel

The steering wheel with horn button can be adjusted by a lever on the left-hand side to improve operators comfortability.

Easy and safe shift lever

A single lever on the left side of the steering column gives the operator fast and easy control of travel direction. The engine can only be started in case of neutral position of this lever.

Multi-function switch lever

A multi-functional switch lever gives easy access to lights and horn.

Enhanced safety through high durability!

Safety and durability are priorities in the design of the equipment.

Strong overhead guard

The safety overhead guard meets ISO 6055 regulations and protects the operator during hazardous jobs.

Parking Brake

Toggle type parking brake requires less efforts from the operator to set.

Highly durable split type drive axle

The advanced drive axle always delivers the desired torque to the drive wheels

Large footstep & Handle

Wide "open" step ensures easy and safe access to the operator's seat

Expansion bellows

The expansion bellows absorbs vibration and reduces noise generated from the exhaust gas system and extends the life cycle.

Electrically Monitored Air Filter

An air cleaner sensor alerts the operator of a restricted air filter so allowing replacement before a potential engine damage occurs.

■ Photo may include optional equipment

Heavy duty single unit frame

Heavy duty single unit type frame, designed on the basis of accurate structural analysis, guarantees durability and safety.

Bright, protected headlights

Bright, protected headlights are positioned for increased visibility in dark environments.

Ground clearance

The engine and transmission are assembled horizontally and positioned high in the frame to protect valuable components during operations on rugged surface.

Centralized design for easy service!

An ideal arrangement of components ensures easy access and convenience during maintenance.

Easy change air cleaner

The air filter is readily accessible for cleaning or replacement.

Fast Service Access for Daily Fluids Check

Rotational Battery Installation

One Touch, No Tool Floor Plate

Removable Side Panels for Ease of Service

Improvement in Maintenance of Electric Parts

Various electric parts are centralized in dash board resulting in effortless troubleshooting.

Easy Maintenance oil check

The T/M oil level can be checked easily without any disassembly.

Brake fluid reservoir

Highly visible and accessible reservoir makes daily inspections a quick and easy job.

An accessible, compact fuse box for easy inspection
